About Let's Connect

Let's Connect offer employees the latest in consumer technology from major manufacturers such as Apple, Samsung, Microsoft, HP, Sonos, Sony and more.

Offering employees access to spread the cost on the very latest in desirable technology to enhance their home and lifestyle, is a worthwhile and valued benefit.

Let's Connect are specialists in delivering these schemes over many years, to many clients across both public and private sectors.

Through salary sacrifice, employees exchange a portion of their gross salary in payment for a tablet, computer, Smart TV, games console, Smartphone or similar, typically over a 24 or 36 months period, making savings in National Insurance. Schemes that run via a net pay arrangement are also available.

This exciting offering helps deliver a wider employee engagement strategy due to the desirability of the products and popularity of the benefit.

A benefit that aligns with core policies

Providing employees with an affordable way to access the latest technology through our scheme delivers benefits across a range of key business drivers:

- Improved IT literacy and relevant digital skills for your workforce that can translate into the workplace
- Better mobilisation and flexible working opportunities through the promotion of mobile technology
- Increased health and wellbeing through the promotion of devices such as smart watches, fitness trackers, blood pressure monitors and smart scales
- Improved financial wellbeing for lower-paid employees by providing an affordable solution to access new technology for them and their family
- Help with engagement, reward, attraction and retention of the best staff.

Please note – actual product range may differ depending on scheme design, employee spending limit and employer preferences. The range is constantly reviewed to ensure the latest products are offered.

iPad and tablets

With so many types of computer available and with the technological landscape always changing it can be hard to know what's the right choice - it may be that the perfect tablet is all the computer you need!

Tablets are smarter than ever, and many are now even more powerful than some laptop computers. Their ease of use, long battery life and portability mean they're brilliant whether you're on the sofa or on the move.

If you're looking for something sleek and stylish to simply browse the internet, watch Netflix or keep the kids entertained, then we have a fantastic range of starter tablets like the brilliant iPad mini or the Microsoft Surface Go that may be the perfect choice for you.

Pro tablets for the professionals

If it's power you're after, then the new Surface Pro 7 or iPad Pro are ready to take your tablet experience to the next level. Both are comparable to the latest premium laptops and packed with the most advanced technology, ensuring they're up to any task you throw at them.

Enhance your tablet package with a range of accessories including the incredible Apple Pencil for iPad. It's great for drawing, sketching, colouring, taking notes, marking up emails and more. And it really is as easy and natural to use as a pencil!

Whether you're looking to work or play, for power or portability, we're bound to have a tablet solution to meet your needs.

The latest tablets from Apple and Microsoft are perfect for work or play

Samsung Galaxy Tab S7

Meet the Galaxy Tab S7. Work and play on the ultra smooth 120Hz AMOLED display, powered by the most powerful chipset Samsung has released to date. Featuring the biggest battery on a Galaxy Tab, the S7 is built to not only last, but keep you going. Even after that, you don't have to power down. Power up and keep going with 45W Super Fast Charging.

Get a PC-like experience with the snap of a keyboard, or use the ultra low latency S Pen to write like never before. An immersive tablet experience changing the way you work and play.

iPad Pro

Introducing iPad Pro, Apple's latest iteration has everything you've come to love and expect from iPad and so much more. The edge-to-edge Liquid Retina display is not only gorgeous and immersive, but also features incredibly advanced technologies. Like ProMotion, True Tone and industry-leading colour accuracy, which make everything feel responsive and look stunning. It contains the smartest, most powerful chip Apple have ever made – the A12Z Bionic – so fast it outpaces most PC laptops available today. iPad Pro now comes with new Pro cameras including a 12MP Wide and a 10MP Ultra Wide lens to help you frame the perfect photo or video. And with the versatility of iPad Pro it's easy to shoot, edit and share 4K videos all on the same device. It will make you rethink what iPad is capable of.

iPad Air Gen 4

An all-screen design, with a stunning Liquid Retina display. Featuring fast, easy and secure Touch ID. All powered by Apples most advanced chip ever – the A14 Bionic. iPad Air does more than a computer in simpler, more magical ways. And now with more features and capabilities, it's more versatile than ever.

With A14 Bionic, you have the power to bring your ideas to life. Shoot a 4K video, then edit it right on iPad Air. Use the Apple Pencil to paint and illustrate with dynamic brushes and subtle shading. And with the enhanced graphics and machine learning performance of A14 Bionic, you can unlock new creative possibilities with photo editing, music creation and more.

Microsoft Surface Pro 7

Surface Pro 7 is your endlessly adaptable tablet partner. Wherever you go, whatever you do, fuel your ideas with the power of next-gen Surface Pro 7 standing ready. With its powerful Intel® Core processor, Fast Charging, all-day battery and Instant On, get back to work whenever inspiration strikes.

Transform from tablet to laptop with the innovative, built-in Kickstand and additional Surface Signature Type Cover. Or Lower the Kickstand into Studio Mode for a natural writing and drawing angle with touch or the addition of the Surface Pen.

Apple Pencil

Apple Pencil is perfect for whenever inspiration strikes. Use it to jot down notes, paint a watercolour or design a building onsite. The second-generation Apple Pencil attaches magnetically with a satisfying snap onto the side of your iPad Pro. Once attached, it automatically pairs with your device and charges so you're always ready to go.

Windows 10 laptops and desktop PCs

A laptop is more than just a computer – it's an entertainment hub, social network, and a workspace – whether you're at home or on the move. We offer a wide range of the latest multimedia devices designed to take your productivity, creativity and entertainment to the next level and allow you to experience the best in graphics and gaming.

Can't decide if you're after a laptop or a tablet? Why not experience the best of both worlds with one of the latest convertible laptops? Seamlessly switch between laptop and tablet by removing or hiding the keyboard and go from word processing to touch-based web browsing in a flash.

Computing at its cutting-edge best

If you're looking for the desktop computing experience, then we have a fantastic range available including the latest All-in-Ones and powerful gaming rigs. All-in-One PCs are the latest innovation in desktop computing, bringing sophisticated style and exceptional performance together behind a single screen. If gaming is of high importance the latest gaming computers combine cutting-edge design and the industry's latest hardware, ready to handle the most intensive games with ease. Whichever option you chose, the desktop PC experience has never looked so good.

So, whether you're searching for a high-performance desktop with a powerful Core i7 processor or require the versatility and flexibility of a more compact, ultra-mobile laptop with detachable keyboard, we're sure you'll find the perfect solution to suit your needs.

Work, learn and stay connected with the latest laptop and desktop computers

Microsoft Surface Laptop 3

Slim and stylish, Surface Laptop 3 is capable of handling the most power hungry apps effortlessly and look good whilst doing it. With the latest Intel® processors at your disposal you'll be able to get everything done at once without slowing your laptop down. Work on your projects while streaming movies and music at the same time - you'll have the muscle power to do everything. Available in a variety of colours, sizes and finishes there's sure to be a Surface Laptop for you.

Available in 13.5 and 15-inch variants, know that whichever you choose the Surface Laptop 3 is guaranteed to bring your photos and videos to life with its stunning PixelSense™ display, and with its touchscreen technology you'll be interacting with them in ways like never before.

Microsoft Surface Book 3

The Surface Book 3 is a versatile laptop, powerful tablet and portable studio, all in one. A sleek, portable powerhouse with up to 17 hours of battery life. Detach the stunning PixelSense™ Display to transform Surface Book 3 into a thin, powerful and lightweight tablet that can be taken anywhere. Fold it into Studio Mode to draw and sketch comfortably and naturally.

Surface Book 3 packs enough power to let you tackle anything you throw at it, let your artistic juices flow with your favourite creative software, or immerse yourself in that new game you've been itching to play. Surface Book 3 is more than up to the task.

Lenovo Yoga laptop

Every component of the Yoga was engineered with your experience in mind. This powerhouse 14-inch 2-in-1 boasts the latest 10th Gen Intel® Core™ processing, epic battery life, and dazzling display options. Sleek, stylish, and loaded with smart features, it delivers robust performance that will amplify yours.

With up to 18 hours of battery life, you could stay entertained on a flight from London to Barbados – and in the taxi on the way to the hotel. If you do need a boost, just power off and charge for an hour, for up to 80% battery life.

Lenovo IdeaCentre All-In-One

With its sleek, modern stand and thin bezel display, the Lenovo IdeaCentre is designed to catch the eye. Fire it up and marvel at the way it handles everything with ease, quickly and smoothly. Even with the space-saving design, it can store plenty too, with enough hard drive space for thousands of movies, songs and photos. Whether it's for work, entertainment, or family video-chats, this eye-catching PC will look great in any room. All in all, this all-in-one makes the ideal home PC.

Apple Macs

Macs are popular for their stunning and iconic designs but there's more going on behind their screens than just looks.

macOS is the operating system that powers every Mac. It lets you do things you simply can't do with other computers. That's because it's designed specifically for the hardware it runs on – and vice versa. With the new Apple M1 Chip every Mac with M1 is transformed into a completely different class of product. Until now, a Mac needed multiple chips to deliver all of its features – including the processor, I/O, security and memory. With M1, these technologies are combined into a single system on a chip (SoC), delivering a new level of integration for more simplicity, more efficiency and amazing performance.

On a Mac, everything is designed to work just the way you expect it to – from operating it with simple, intuitive gestures to asking Siri to find a file, to having your apps automatically update themselves. Whatever you set out to do on a Mac, there's much less to learn and much more to accomplish.

Seamless Apple integration

Mac works with your other Apple devices in ways no other computer can. If you get a call on your iPhone, you can take it on your Mac. With Continuity Camera, you can use your iPhone to take a picture or scan a document nearby, and it will appear on your Mac. When you copy text or an image from one device, you can paste it into another with standard copy and paste commands. You can even unlock your Mac with your Apple Watch. No password typing required.

We offer an incredible range of Mac products from the unbelievably thin MacBook Air to the all-powerful iMac desktop, meaning there's sure to be the perfect Apple experience waiting for you.

Discover the innovative world of Apple with the latest Mac computers

iMac

The vision behind iMac has never wavered: transform the desktop experience by fitting powerful, easy-to-use technology into an elegant, all-in-one design. The new iMac takes that idea to the next level – giving you even more amazing tools to do just about anything.

iMac is packed with the latest processors, faster memory and phenomenal graphics. All coming to life on the brightest, most vibrant Retina display ever on a Mac. With 1 billion colours and 500 nits of brightness, graphics leap off the screen. It's the total package – powered up.

MacBook Pro

The Apple M1 chip gives the new 13-inch MacBook Pro speed and power beyond belief. With up to 2.8x CPU performance. Up to 5x the graphics speed. Apple's most advanced Neural Engine for up to 11x faster machine learning. And up to 20 hours of battery life – the longest of any Mac ever. Apple's most popular pro notebook has been taken to a whole new level.

With the brilliant Retina display, images take on an incredible level of detail and realism. Text is sharp and clear. Bright LED backlighting delivers deep blacks and bright whites. P3 wide colour brings even more vibrant greens and reds than sRGB. And every MacBook Pro features True Tone technology, so the white balance automatically adjusts to match the colour temperature of the light around you – for a more natural viewing experience.

MacBook Air

Power. It's in the Air. Apple's thinnest, lightest notebook, has been completely transformed by the all new Apple M1 chip. With CPU speeds up to 3.5x faster. GPU speeds up to 5x faster. The most advanced Apple Neural Engine yet for up to 9x faster machine learning. The longest battery life ever in a MacBook Air. And a silent, fanless design. This much power has never been this ready to go.

Images take on new levels of detail on the brilliant 13.3-inch, 2560x1600-resolution Retina display. Text is sharp and clear. Colours are more vibrant than ever. And the glass goes right to the edge of the enclosure, so nothing takes away from your gorgeous view.

Mac mini

Measuring at 19.7cm in width and depth, and just 3.6cm in height. When we say 'mini' we really mean it.

In addition to being a great desktop computer, Mac mini powers everything from home automation to film production. And now with the Apple M1 chip this do-it-all desktop enters a whole other dimension. With up to 3x faster CPU performance. Up to 6x faster graphics. And Apple's most advanced Neural Engine for up to 15x faster machine learning. Get ready to work, play and create on Mac mini with speed and power beyond anything you ever imagined.

Introducing the Touch Bar – a Multi-Touch-enabled strip of glass built into the keyboard that allows for instant access to the tools needed, right when they're needed – saving time and keystrokes. Added Touch ID allows for fast, easy authentication for secure logins and purchases.

Smart TVs

OLED or QLED? 43-Inch or 65-inch? Choose from a wide range of stunning Full HD and 4K Ultra HD Smart TVs and find the perfect entertainment solution for any room in your home.

We offer huge a range of the latest televisions from leading manufacturers including LG, Samsung and Toshiba. With sizes ranging from 32-inch all the way up to a staggering 86-inch if you really want to bring that cinema experience home.

Which TV is right for me?

OLED, QLED, LED, UHD, HDR with so many terms it can be hard to know where to begin when selecting your new TV. Luckily we're here to help break down some of this jargon and help you find the perfect new set for your situation.

4K otherwise known as Ultra High Definition or UHD has four times the pixel count as 'normal' HD 1080p which has become the standard in recent years. With a 4K TV you'll be able to enjoy more detail and clarity in your picture.

HDR stands for High Dynamic Range. This technology may be built into some televisions and allows for greater image contrast. With HDR enabled content you'll see deeper blacks and brighter whites on screen along with all the shades in-between.

OLED, QLED and LED all refer to the various competing display technologies and each offers its own advantages and disadvantages to navigate.

LED and QLED TVs both use LED backlighting to generate the colours you see on screen leading to a much brighter image than is possible on an OLED TV. QLED TVs also add in a quantum dot layer which filters the light to produce more pure and saturated colours leading to truly eye-popping images.

OLED stands for Organic Light-Emitting Diode. These TVs are made of organic compounds that light up when fed electricity, and shut down completely without it. This allows them to adjust the luminosity of each of their pixels individually and turn them completely off to show pure blacks and infinite contrast, giving them exceptional picture quality with the deepest colour range possible.

Bring the cinema experience into your living room with the latest 4K TVs

Samsung QLED TV

Discover pure colour in a whole new light with Samsung's QLED range. Samsung's QLED screens are at the cutting edge of home visual entertainment, with a picture quality that will take your breath away. QLED, a refinement of their Quantum Dot technology, delivers UHD Premium picture quality for jaw-dropping colour and a flawlessly realistic HDR picture of the highest luminance and exceptionally deep blacks.

QLED stands for Quantum-dot Light-Emitting Diode. These LED TVs include an advanced and highly durable quantum dot layer, which enhances picture quality. This layer is combined with a special blue LED to create the purest white light possible, which means QLED TVs deliver the highest brightness levels currently on the market. Plus, QLED offers the largest colour palette with billions of shades, compared to millions in a standard LED TV, so the experience is closer to being at the cinema.

LG OLED TV

Bask in the staggering, colour-rich realism of 4K HDR OLED picture with LG's outstanding OLED range. Beautifully thin OLED panels, pin-sharp 4K UHD resolution and stunning HDR colour-scape combine to create an awe-inspiring picture. Powered by the Alpha 9 processor, enjoy Perfect Colour on Perfect Black with incredible clarity.

Use LG's award-winning webOS Smart platform to stream content from apps including Netflix and Amazon Prime, interact by voice with its intelligent ThinQ AI, and navigate with the intuitive Magic Remote.

Samsung UHD TV

Experience exceptional picture quality and crystal clear, lifelike colour with Samsung's UHD TVs with Dynamic Crystal Colour technology. With more than one billion colours – 64 times more than conventional UHD TVs – the Dynamic Crystal Colour display delivers picture-perfect results every time.

Access a world of online entertainment via Samsung's Smart Hub and connect to your favourite streaming services without the need for an external device. Your favourite shows are only ever a couple of clicks away.

LG NanoCell TV

NanoCell TV is LG's most advanced LED TV, delivering superior picture quality with enhanced RGB colour purity. NanoCell technology enhances the purity of colour using about 1nm nanoparticles that purify colours by filtering out dull colours and enhancing the purity of the RGB spectrum.

LG AI TV expands your AI experience, get answers to questions and control smart home appliances all through the power of your voice. With just a simple voice request, LG AI TV can make suggestions by learning your viewing habits and patterns.

Games consoles

Whether it's defending the planet against aliens, racing to the finish line in your dream sports car or leading your favourite football team to premier league victory, we're sure to have the ideal games console to suit you.

Visit new worlds from the comfort of your couch or take them with you on the road. The Nintendo Switch lets you play anywhere, anytime, with anyone. A unique blend of home console and handheld device.

A new generation of games is here

Play blockbuster experiences on PlayStation 5 or the Xbox Series X|S consoles. These next generation machines offer incredible graphics, super fast loading and much more. They're also backwards compatible with previous generation games meaning there's an extensive library of exciting experiences ready and waiting. Connect to the internet and jump online with friends or foes across the globe for some serious multiplayer fun.

On Xbox Series X and PlayStation 5 experience true 4K gaming at a silky smooth 60 FPS (Frames Per Second) with the ability to push upwards of 120 FPS and 8K on select titles. You can also enjoy the benefits of a built in 4K Blu-ray player for the ultimate cinema experience.

The Xbox Series S offers next-gen performance in the smallest Xbox ever. With more dynamic worlds and faster loading times, this all-digital console offers a great value entry point to the latest generation.

The latest devices offer more than just gaming – stream the biggest movies, hottest TV shows and latest videos from Netflix, Amazon, YouTube and a host of entertainment apps.

Bring games to life with our VR gaming bundles and VR accessories. Be at the centre of an incredible gaming universe with added depth and realism, and experience a new way to play.

We offer a host of gaming bundles with extra controllers, games and accessories so you'll be ready to play straight out of the box.

Fun for the whole family at home or on the move with the latest games consoles

Xbox Series X

Power your dreams with the all-new Xbox Series X, the most powerful Xbox console yet, fine-tuned for the ultimate next-gen experience. With four times the processing power of the Xbox One, Series X is ready to take your gaming experience to the next level. Experience super smooth frame rates up to 120 FPS at a crisp 4K resolution.

From future adventures, to current obsessions, to classic titles, thousands of favourites across four generations of Xbox look and play best on Xbox Series X.

Nintendo Switch

Nintendo Switch is designed to go wherever you do, transforming from home console to portable system in a snap. So you get more time to play the games you love, however you like.

Dock the console to experience HD gaming on your TV, and use the Joy-Con to play. The detachable Joy-Con controllers can be joined together for solo play or shared among friends for some serious multiplayer fun!

When you're ready to move attach the Joy-Con to the console and leave the TV behind to take gaming on the go.

Nintendo Switch Lite

Nintendo Switch Lite is the console for gamers on the go. A dedicated handheld only device capable of playing home console quality games wherever life may take you.

Nintendo Switch Lite is designed to support all Nintendo Switch games that feature a handheld mode. The streamlined design makes it easy to pack up and play in the park, on the train or wherever life may take you. Available in a variety of vibrant colours there's bound to be Switch Lite to fit your style.

PlayStation 5

Play Has No Limits with PlayStation 5. Experience lightning fast loading with an ultra-high speed SSD, deeper immersion with support for haptic feedback, adaptive triggers and 3D Audio, and an all-new generation of incredible PlayStation games.

With support for 8K output and frame rates up to 120 FPS, PlayStation 5 is not just for the here and now but ready for the future as well. The ultra-high speed SSD can pull data so quickly load times are near instant and games can be designed in ways never before possible.

Hold the next generation of gaming in your hands, with the PlayStation 5 DualSense controller. The PS5 DualSense controller has been beautifully crafted to give you an incredibly intuitive playing experience.

Discover a deeper, highly immersive gaming experience that brings the action to life in the palm of your hands. The DualSense wireless controller offers haptic feedback, dynamic adaptive triggers, and a built-in microphone, all integrated into an iconic comfortable design.

Digital audio

Amplify your home entertainment with our range of digital audio equipment from high-end manufacturers including Apple, Bang & Olufsen, Beats, Bowers & Wilkins, JBL and Sonos.

Enjoy music on the move with our range of high-quality in-ear and on-ear headphones. Experience incredible acoustic performance and unrivalled sound with a lightweight, comfortable design. Grab a pair of wireless headphones for true freedom of movement, perfect for working out. Connect them to your Smartphone or even your Smart Watch and enjoy your favourite tunes on the move without ever worrying about wires.

Also on offer are a great range of stylish, ultra-portable personal speakers, designed to take your tunes wherever you go and play them out there in crystal-clear Hi-Fi clarity.

Home cinema for music lovers

Sonos is the wireless home sound system that fills as many rooms as desired with epic sound for all your films, games and TV shows. And it streams music, too. For those times when all you need is a good tune. No wires or complicated programming. Just tap the Sonos app and it does the rest. Stream via Wi-Fi. Play different tunes in different rooms at the same time. Or share one song, in perfect sync, all throughout your house for an intense, pulse-pounding experience.

The Sonos app helps you quickly search through all your services to track down your favourite music, play it and adjust the volume in different rooms throughout the home. You don't even have to be in the same room as a speaker. And if your friends have the Sonos app, they can do the same.

Transform your home cinema experience with soundbars and more...

Sonos Move

The durable, battery-powered smart speaker for outdoor and indoor listening. Get brilliant sound anywhere with the weatherproof and drop-resistant Move. Control with your voice, the Sonos app, and Apple AirPlay 2 at home, and stream via Bluetooth when Wi-Fi isn't available.

Experience surprisingly deep bass, a wide soundscape, and automatic Trueplay™ tuning that perfectly balances the sound for where you are and what you're listening to.

No need to plug Move in. Set the speaker on the included indoor charging base for quick power whilst you listen, and get power wherever you need it with an additional charging base.

Sonos Arc Soundbar

Bring all your entertainment to life with the brilliantly realistic sound of Arc, featuring Dolby Atmos. Experience shows, movies, and games with the precise and immersive sound of Dolby Atmos. Arc's upward-firing speaker drivers create a multi-dimensional soundstage that moves around you, rendering every whisper and explosion with dramatic clarity, detail, and depth.

Apple AirPods Pro

AirPods Pro have been designed to deliver Active Noise Cancellation for immersive sound, Transparency mode so you can hear your surroundings and a customisable fit for all-day comfort. Just like AirPods, AirPods Pro connect like magic to your iPhone or Apple Watch. And they're ready to use straight out of the case.

The Wireless Charging Case delivers over 24 hours of battery life to keep you and your AirPods Pro on the go. When the battery is low, AirPods Pro send a notification to your iPhone letting you know it's time to charge.

Apple AirPods Max

Introducing AirPods Max – a perfect balance of exhilarating high-fidelity audio and the effortless magic of AirPods. The ultimate personal listening experience is here.

AirPods Max combine high-fidelity audio with industry-leading Active Noise Cancellation to deliver an unparalleled listening experience. The over-ear headphone has been completely reimagined. From cushion to canopy, AirPods Max are designed for an uncompromising fit that creates the optimal acoustic seal for many different head shapes – fully immersing you in every sound.

Samsung Galaxy Buds Live

With their jewellery-like design and reflective metallic finish, Samsung Galaxy Buds Live are stylish, iconic and designed to turn heads. But it's not just style for style's sake – they're ergonomically crafted for superior comfort and a snug fit, so you can wear them all day and really lose yourself in your music.

With sound backed up by Grammy Award-winning AKG technology, you can be sure that you'll hear the treble, feel the bass, and lose yourself in immersive sound. And Active Noise Cancellation lets you control how much background sound you can hear – so don't worry about not hearing your stop on the train.

Smart watches

The latest smart watches from Apple, Samsung and Fitbit combine cutting edge technology with designer style, updating the classic wrist watch with more features and uses than ever before. Whether you're looking to keep on top of your fitness or your social media, the latest smart watches can do it all and so much more.

They can make a fantastic companion to your Smartphone, allowing you to take calls, receive messages and listen to your favourite music – all from your wrist. With smart assistants Siri (on Apple devices) or Bixby (on Samsung) use the power of your voice to search the web, get directions or ask for the latest headlines.

Stay healthy with a host of fitness features. Track your steps, count calories and monitor your sleep patterns to ensure you're living life to the fullest. From simple nudges to stand up and drink water to competitions with friends, there are plenty of features to get you motivated.

Leave your phone at home

With a cellular smartwatch you get all the same fantastic features but without the need to be tethered to your Smartphone. Allowing you to remain connected and reachable wherever you are, combine it with Apple Pay or Google Pay (Android phones) you can even leave your wallet behind.

Apple Watch Series 6 inspires you to live a healthier life by helping you manage everything from everyday stress to calories burned. At the same time, it lets you check your heart rate and notifies you if it's above or below your specified threshold. And that sense of security now goes a step further with Fall Detection and Emergency SOS. Apple Watch has your back – as well as your heart.

The latest smart watches do so much more than tell the time and they look good doing it

Fitbit Ace 2

Fitbit's swimproof activity tracker for kids 6+, Ace 2 makes family time more fun. To the playground and beyond, kids need an activity tracker that's as resilient as they are. It's full of motivating challenges, up to five days of battery, sleep tracking and inspiring ways to connect with parents, siblings and friends.

There's nothing more meaningful than building healthy habits together, and Ace 2 is the perfect way to get the whole family moving in a way that's rewarding and fun.

Samsung Galaxy Watch3

Control your day from your wrist. Galaxy Watch3 lets you check your schedule, message your mates, and pay for your morning coffee without reaching for your phone or wallet.

Take your pick of two sizes, 45mm or 41mm, each with a face you won't soon forget. Outlined in a subtle rotating bezel, it's easier to see and focus on what matters with an even bigger screen. Galaxy Watch3 is thinner and lighter than its predecessor, with a sophisticated look and slimmed down frame. Galaxy Watch3's design is polished off with a premium genuine leather strap that screams both style and quality.

Fitbit Sense

Fitbit Sense is the advanced health smartwatch that helps you tune in to your body with tools for stress management, heart health, SpO2, skin temperature and more. With a 6+ day battery life you can get a weeks worth of health and fitness tracking without stopping for a charge. When you finally do get low on juice the fast charging function means you can get a full days fuel in just 12 minutes.

Fitbit Sense is more than health and fitness. Take calls, get notifications and even use Fitbit Pay to make contactless payments – no phone or wallet necessary.

Apple Watch Series 6

Track your workouts and activity more precisely than ever – in the water, at the gym or on the road. With Apple Watch Series 6 the future of health is on your wrist. Measure your blood oxygen level with a revolutionary new sensor and app. Take an ECG anytime, anywhere. See your fitness metrics at a glance with the enhanced Always-On Retina display. Go to new heights, lengths and depths with GPS, real-time elevation and the built-in compass for navigation. Close your Activity rings for a healthier day. And stay inspired to keep moving by streaming music, podcasts and audiobooks from your watch.

With Apple Watch Series 6 on your wrist, a healthier, more active, more connected life is within reach.

Apple Watch SE

Apple Watch SE has everything you've come to love and expect from Apple Watch. Created with the same design and larger-size Retina display as Series 6, so you can see more at a glance. Advanced sensors allow you to track all your fitness and workout goals. And powerful features are on hand to keep you healthy and safe. You also get calls, messages and music right on your wrist. Apple Watch SE is a lot of watch for a lot less than you expected.

Smartphones

Talk, text, browse and play with the latest must-have Smartphones from world-class leading manufacturers including Apple and Samsung.

Smartphones are getting a whole lot smarter. With Siri, Google assistant and Bixby installed your phone now becomes your personal assistant. Check the weather, make an appointment, get directions and more. Just ask.

Many of the latest Smartphones allow you to make contactless payments directly from your device. Secured with a fingerprint, or even a scan of your face (on newer iPhone models).

Rewrite the rules of photography

You no longer need an expensive DSLR to take stunning photographs. The latest Smartphones come packing multiple cameras and advanced processing power, unlocking new creative possibilities and helping you capture incredible photos like a pro.

Download thousands of apps from gaming to mobile banking. Access and maximise all of your favourite social networks. Watch the latest releases from Netflix or Amazon Prime. Play a huge range of games online or off. All of these and so much more are in the palm of your hands.

All of our Smartphones are provided SIM free, so if you're already on the perfect network plan or are tied into a long-term contract, the latest mobile phones are never out of reach.

Never miss a moment and stay connected on the latest smartphones

iPhone 12 and 12 mini

iPhone 12 pushes everything forward with superfast 5G. A14 Bionic, the fastest chip in a smartphone. A new dual-camera system. And a beautiful Super Retina XDR display, so you can see everything in vivid detail. Plus it's now available in two perfect sizes. The iPhone 12 mini packs all of the same great features as its larger counterpart into a much smaller form factor – making it, 'The world's smallest, thinnest and lightest 5G phone.'

iPhone 12 Pro and 12 Pro Max

5G goes Pro with the new iPhone 12 Pro and Pro max. Featuring the Apple A14 Bionic, the first 5-nanometre chip in the industry, with advanced components literally atoms wide. The Pro camera system takes low-light photography to the next level – with an even bigger jump on iPhone 12 Pro Max. And Ceramic Shield delivers four times better drop performance. The next generation iPhone has officially arrived.

Samsung Galaxy S21 Series

Made for the epic in everyday. Samsung Galaxy S21, S21+ and S21 Ultra will ensure you never miss that perfect shot again. With revolutionary 8K Video Snap changing how you capture not just video but photography – and 5G changing the way you share it. Add in an intelligent battery, powerful processor and massive storage – and the Galaxy S21 series unveils a whole new world for mobile.

With a 40MP selfie camera and a 108MP wide-angle lens with upto 100x zoom the S21 Ultra is ready to take mobile photography to the next level.

iPhone SE

The iPhone SE, packs a remarkably powerful chip into Apple's most popular sized handset at their most affordable price yet. It's just what you've been waiting for.

With the state of the art A13 Bionic chip (the same used in the iPhone 11 Pro) you can expect super fast fluid performance when you need it and increased power conservation when you don't. The A13 Bionic pairs with the SE's advanced camera system to bring you Portrait mode, which artfully blurs the background to put the focus on your subject – even when you're taking selfies.

Samsung Galaxy Note20

One of the first to merge a pen with a phone, Galaxy Note puts a whole new world in your pocket. As we face a new normal, life demands a new kind of device. This is not a smartphone as you know it. This is a computer in your pocket. This is next-level gaming on mobile. This is a pro-grade 8K camera and editing suite. This is Galaxy Note20.

With the S Pen you can transform the way you work on the go. S Pen offers groundbreakingly low latency to provide an incredibly realistic pen experience packed with incredible features.

Smart home

Make your house a smart home with our range of clever home automation and security devices.

Ever left home and got that horrible feeling that maybe you left the iron on? With a set of smart plugs you'll never have to worry again – just open the app on your phone and turn the plug off remotely from anywhere in the world.

If you're tired of coming back to a cold home or sick of wasting energy and money by leaving the heating on all day then a smart thermostat system could be a valuable addition to your home. Not only can you easily control the temperature from your phone or other smart device, the new Nest Learning Thermostat will actually get to know your routine and adjust energy usage accordingly. As you turn the temperature up and down, it gradually learns your schedule and will customise your heating and hot water so it's on when you need it and off when you don't.

Your hands-free helper

Grab a smart assistant from Amazon, Apple or Google and you'll open up a whole world of ever-expanding smart features with the power of your voice. Looking for cooking tips? Want to know the day's headlines? Need to add to your shopping list? Do all of these and so much more. Most even feature high quality speakers so you can enjoy your favourite music, just ask.

Stay secure with our selection of smart home security devices. We have a range of smart video doorbells and security cameras so you can monitor your home from anywhere in the world. Get instant alerts on your smart device whenever anyone presses your doorbell or triggers a motion sensor. You can even see, hear and speak to visitors from your Smartphone, tablet or PC.

Stay safe, connected and in control with the latest smart home innovations

Apple HomePod Mini

Jam-packed with innovation, HomePod mini delivers unexpectedly big sound for a speaker of its size. At just under 8.5 centimetres tall, it takes up almost no space but fills the entire room with rich, 360-degree audio that sounds amazing from every angle.

Siri is your do-it-all intelligent assistant that puts HomePod mini at the centre of your family's activities. Whether you need a hand with a wide variety of everyday tasks, want easy control over your smart home accessories or simply want to hear your favourite song – just ask Siri.

Amazon Echo Studio

Meet Echo Studio. You've never heard an Echo like this before. Echo Studio creates an immersive, 3-dimensional soundscape, wrapping you in studio-quality audio from every direction. Human ears care where sound is coming from. Echo Studio turns that evolutionary truth into a revolutionary advantage. Five strategically positioned speakers generate room-filling sound, sending different parts of the song to your ears from different directions. It's music as the artist intended, as immersive as it is expansive.

Philips Hue smart lighting

Discover the amazing things you can do with white and coloured light, now with even richer colours for better scene setting. Sync with music and movies – extend your TV viewing experience to the whole room, or sync light to your favourite music and enjoy every beat.

Light up your gaming and take your games to the next level. Philips hue lights can sync to your games for an immersive gaming session. The lights respond to events in the game for an intense experience.

Philips Hue is compatible with Apple HomePod, Amazon Alexa, Google Assistant, and more.

Ring smart security

With Ring, you can monitor your home from your Smartphone, tablet or PC. Every Ring device features a wide-angle lens and a built-in microphone and speaker, so you can see, hear and speak to anyone on your property from anywhere.

Ring's customizable motion sensors let you focus-in on the most important areas of your home. You'll get instant alerts as soon as Ring detects motion, so you'll always be the first to know when anyone steps foot on your property.

Amazon Echo Dot

The all-new Echo Dot is here. Amazon's most popular smart speaker has a sleek, compact design that fits perfectly into small spaces. It delivers crisp vocals and balanced bass for full sound you can enjoy anywhere in your home.

Make your life easier at home with help from Alexa. Set timers, ask questions, add items to lists, and create reminders. Access tens of thousands of Alexa skills, all using just your voice.

Amazon Echo Show 8

Echo Show 8 connects to Alexa to give you rich stereo sound with vivid visuals on an 8-inch HD screen. See on-screen lyrics with Amazon Music. Set alarms and timers. Display your favourite photos. Check weather and traffic as you head out. Catch up on news highlights.

You can call almost anyone hands-free, including making video calls. Call UK mobile and residential numbers, other Echo devices, the Alexa app and Skype.

Put your health in the palm of your hands with the latest gadgets

Health and wellbeing

On the walk to work, in the weights room or on the last mile – every moment matters. When meeting fitness goals, steps are just the beginning. Get the most from workouts, improve lifestyle or simply monitor daily activity with our fantastic range of fitness wearables.

Sync your readings with the Omron connect app to track your results, monitor your progress, and get a deeper understanding of your health over time.

Ring Fit Adventure

Ring Fit Adventure is here to make fitness fun! This new type of adventure game coming to Nintendo Switch, uses unique accessories that detect and measure the player's real-world movements and turn them into in-game actions.

The unique new Ring-Con and Leg Strap accessories enable players to explore and battle in the game world using the power of real-world exercise.

The game box includes Ring Fit Adventure game, plus the Ring-Con and Leg Strap accessories. Nintendo Switch console and Joy-Cons sold separately.

Fitbit Aria Air Smart Scales

Get a more complete picture of your health with the Fitbit Aria Air smart scale. This easy to use smart scale displays your weight and syncs it to the Fitbit app where you can view your BMI, track your trends over time and see how things like activity and nutrition impact your goals.

Aria Air allows multiple users to measure their weight when their phone is connected to the scale. Just open the Fitbit app, step on the scale and Aria Air will display your weight and sync to your Fitbit account over Bluetooth.

Small domestic appliances and garden equipment

Get your grass looking greener and your patio looking cleaner with our range of garden equipment from Kärcher. We offer a huge range of outdoor maintenance equipment from leading brand Kärcher including lawn mowers and lawn trimmers, chainsaws, pressure washers and more. Kärcher are known for their high quality user friendly equipment that will make light work of your garden chores for years to come.

If you're looking to keep the interior of your house tidy too don't worry we've got you covered. The Kärcher FC 5 Cordless Premium Hard Floor Cleaner is the quick and easy way to wash your floors and vacuum up light debris simultaneously. 20% better cleaning performance compared to conventional mopping. The combination of the built-in vacuum function and super absorbent microfibre rollers leave your floors dry in just two minutes.

The latest technology with retro style

We offer a fantastic range of Smeg small appliances that are sure to bring some retro flare to your worktop. Smeg are known for their iconic style and are designed to add an extra level to both the aesthetics and performance in the kitchen. With toasters, kettles, coffee machines and more, available in a variety of colours - you can mix and match to compliment any decor or add a pop of colour to brighten up your day.

Keep on top of your home maintenance with our fantastic range of home appliances

Kärcher LMO 18-36 cordless lawn mower

The Kärcher LMO 18-36 is a battery-powered lawnmower with a wide cutting path and large grass catcher box designed to make light work of mowing the lawn. This machine's 2-in-1 mowing system gives you the flexibility to decide between collecting grass cuttings in the 45-litre box or distributing them evenly to fertilise your lawn chemical-free. Its sharp steel knife blade guarantees neat results, while a 36mm cutting width covers more area as you work.

Kärcher HGE 18-50 cordless hedge trimmer

The Kärcher HGE 18-50 cordless hedge trimmer safely makes light work of trimming hedges and other garden pruning tasks. The HGE 18-50's 180° rotating handle stops your arms and shoulders getting tired while you're making vertical cuts, while the practical cutting sweeper clears away cuttings so you don't have to leave them on the bush. An anti-jam system stops the blade from being blocked, with a built-in blade protector to guard against building edges. A saw function takes on thicker branches with ease.

Kärcher K 4 Full Control pressure washer

The Kärcher K 4 Full Control pressure washer is a great addition to your tools. It will help you achieve amazing results, whether you are looking to clean your patio, car, wheelie bin, or more. The new full control system can help you find the right pressure setting for any situation, ensuring an optimal clean. The Full Control trigger gun and spray lances give you direct feedback as to the pressure setting you are on, ensuring you get the right pressure setting for the surface you are trying to clean.

Smeg stand mixer

A cake to offer to your friends, the unique scent of home-baked bread or fresh pasta that will amaze your dinner guests. With the Smeg 50's Style Stand Mixer, recipes take shape thanks to a reliable, robust and efficient assistant.

Smeg toaster

The Smeg toaster combines ergonomics, functionality, and aesthetic balance. Breakfast, lunch, brunch, or snack - when you fall in love with the Smeg 50's Style toaster, you'll find every excuse to use it.

Smeg blender

At breakfast for a healthy smoothie, after a workout to revitalise yourself or at lunch to prepare a quick and simple soup, a Smeg blender perfectly blends ingredients of different textures to perfection.

Smeg coffee machine

The Italian coffee making tradition finally conquers the domestic space, enchanting coffee lovers. Smeg Espresso Coffee Machine can be used with both ground coffee and paper pods, allowing you to choose amongst your favourite coffee roasters. Bring home all the taste and aroma of the coffee served at your favourite coffee shop.

Smeg kettle

With its mix of technology and retro style, the 50's Style kettle makes every moment special, from breakfast to afternoon tea, to relaxing in the evening. It boils water quickly, precisely and efficiently.

Take to the skies for some serious fun with the latest drones

5 Benefits that delight your employees and your Finance Manager

Contrary to what many think, providing your employees with a pay rise is not always the key to a happy and productive workforce. Research has shown that employee motivation is often driven by more than just money. Whilst a pay rise may delay your employees from looking for a job elsewhere, it's unlikely to instill long term loyalty.

Instead, you should look to offer employee benefits that are as diverse as your workforce. That doesn't mean following the lead of the tech giants and offering extreme (and expensive!) perks. There are many employee benefits which will deliver great ROI and will not only delight a diverse workforce but also your finance manager.

Digital Transformation Are you being left behind?

Digital transformation is not simply about correcting an imbalance in digital skills or investing in new technology, it's a journey of strategic, planned organisational change designed to create new, sustainable competitive advantage for an organisation. Employees with a "digital-first" mindset will help drive an organisation's performance through innovation and agility. Read our guide and ensure that it's not your employees who get left behind in the digital revolution.

Forget the Engagement: Are you giving good employee experience?

High levels of employee engagement can bring a wealth of benefits to an organisation, hence its widespread focus in management practice since the 2000s. However, many of today's leading organisations are realising that employee engagement is simply the outcome; it's the end result of providing your employees with a great experience (EX). Considering that around two-thirds of the UK's workforce say they are unhappy and unmotivated at work, these organisations understand that shifting their focus now to improve the holistic employee experience is essential to their continued success.

In this guide, we look at ways to provide a positive employee experience that will engage people and build long-lasting loyalty to your business.
